about

Product Designer with 7+ years of experience crafting intuitive, scalable experiences across fintech, SaaS, and emerging technologies. I specialize in end-to-end product execution — from strategic research and problem framing to pixel-perfect delivery and launch. Known for a high bias for action, I bring deep user empathy, cross-functional collaboration, and a systems mindset to every project. Currently shaping product experiences at a fast-paced B2B fintech startup.

Completed a demanding training to earn the above certificate.

Infosys Certified Digital Accessibility Associate.

work experience

Xflow | Product Designer Sep 2022 – Present

Leading product design across invoicing, developer experience, and checkout in a fast-growing B2B fintech startup

- Revamped self-serve invoicing tools, reducing invoice generation time by 40%, cutting drop-offs by 30%, and achieving 20x user preference over legacy workflows.
- Redesigned key merchant-facing experiences for a core platform vertical handling 80%+ of total processing volume. Upgraded fee visibility, leading to a 25% drop in support queries from merchants.
- Scaled platform UI for multi-currency support across INR Checkout, Invoicing, and API Onboarding — modernizing 90%+ of user-facing flows to meet global expansion needs.
- Leading API and developer experience revamp, including design of a self-serve upgrade journey — freeing 90% of ops bandwidth and improving developer satisfaction.
- Built PostHog-based analytics dashboards from scratch, unlocking real-time usage insights for product, design, and support teams to drive data-backed decision-making.
- Introduced motion and 3D UI elements using Lottie and custom renders — elevating brand perception and improving UX across website and dashboard experiences.

Wongdoody (Infosys) | Lead Experience Designer Sep 2020 – Sep 2022

Worked with multiple Fortune 500 clients across domains.

- Modernized a legacy product for Samsung Korea, introducing multilingual support and interaction upgrades — resulting in a 30% improvement in turnaround time (TAT) for internal workflows.
- Led VUI design for Intel R&D, crafting voice interaction flows for the Temi Robot — successfully launched globally across Intel's retail experience centers

Freelance Designer Jul 2018 – Sep 2022

Worked across multiple design domains including UX, architecture, branding and Industrial Design.

- Led branding and pitch design for early-stage consumer brands — SOMA (a premium liqueur label) and Oris (a sustainable toothbrush brand).
- Delivered complete identity systems and investor decks, contributing directly to successful seed fundraising and go-to-market launches.
